

Fourie Financial Services was established in 1998 by founding members, Kotie- and Amelia Fourie. The firm, better known as Kotie Fourie Brokers is situated in the heart of the Karoo, in the small town, De Aar.

Celebrating more than 20 years in the industry

Kotie and Amelia Fourie joined the then, Sanlam branch in De Aar in 1990 as financial advisors. In 1998, they decided to become Independent Brokers to provide a more comprehensive service to their clients. They then established their own firm known as Kotie Fourie Brokers Cc. The firm has grown and in 1999 they needed to appoint a short-term broker and so Rudolf Visagie became part of the team. The business went from strength to strength and reached great heights. Clients have become like family and even if clients left town, they did not leave the firm.

Fourie Financial Services still serves clients from all over South Africa and even overseas.

In November 2018, the firm celebrated 20 years in the industry, a proud moment for Kotie and Amelia.

In 2015, their children, Stephan and Elzaan Fourie, moved from Bloemfontein and joined the firm as Professional Accountants. This is how the accounting division was established to deliver a wider range of services to clients. The business's name has changed to Fourie Financial Services and Accountants in Practice, a one-stop service for almost all your financial needs.

Stephan and Elzaan completed their professional training in Bloemfontein and are accredited with the South African Institute of Professional Accountants as well as the South African Institute of Tax Practitioners. Stephan and Elzaan attribute themselves to becoming personally part of their clients' businesses in order to provide advice and service on every financial level on a daily basis.

Today, Fourie Financial Services is an established business that is one of the best known, strongest and most reliable businesses in the main town of the Upper Karoo.

Our team further expanded in January 2019 with two trainee accountants who started training with us.

The FFS team is very excited about the future!
